SUGGESTED EQUIPMENT LIST

MEDICAL NECESSITY IS DETERMINED FOR THE INDIVIDUAL CHILD

- Suction machine
  - Portable
  - Transformer / Rectifier / Recharger
  - Electric

- Suction catheters
  - Size ________________
  - Kits
  - Single

- Suction connecting tubing

- Saline
  - Disposable
  - Bottles

- Durable air compressor, all purpose nebulizer, tracheal mist collar
  - Heated Temp ________________
  - Cool
  - Size of Mask ________________

- Room humidifier

- Heat and moisture exchangers OR artificial noses, quantity per month ________________

- Resuscitation bag
  - Size ________________

- Tracheotomy adaptors, if needed for metal trach tube or T-tube
  - Size ________________

- Face mask
  - Size ________________

- Monitors
  - Heart Rate (HR) / Apnea
    - Limits:
      - High HR ________
      - Low HR ________
      - Apnea delay ________________
  - Pulse oximeter
    - Cont
    - Spot check
    - Settings:
      - Low Sats ________
      - Low HR ________

- Oxygen
  - Conc / liter flow ________________
  - Mode of delivery ________________
  - Carrier
  - Portable System
  - Type of adaptor for portable ________________
  - Oxygen analyzer

- Air compressor, handheld nebulizer, updrafts

- Ventilator (Double check with MD / RT)
  - Type ________________
  - Ventilator equipment: i.e., cascades, circuits, etc.
    - ________________
    - ________________
    - ________________
    - ________________

- Tracheotomy tubes
  - Brand ________________
  - Size ________________
  - Length ________________
  - One size smaller ________________

- Self-fastening ties
- Small paper cups
- Hemostats
- Twill ties
- Tissues
- Tweezers
- Hydrogen peroxide
- Gauze
- KY Jelly
- Cotton-tipped applicators
- Telfa
- Bandage scissors
- Distilled water
- Sof-Wik
- Pipe cleaners
- Mucous traps – Size ________________
- Intercom
- Commercial disinfectant
- Speaking valve – Type ________________
